REQUIREMENTS

MAY-SEP

Requirements of AZUR Fisioterapia

AZUR PHYSIOTHERAPY is a health institute where patients who request an appointment are assisted, people must approach to book an appointment. Some of these patients have limitations and it is difficult for them to book an appointment, it can also be booked by phone but this method becomes a bit inefficient if it is needed urgently.

For this reason, the founders of this clinic request the creation of a web page to schedule appointments. This site will be able to register a patient to save it in a database and from this, be able to schedule an appointment in any type of specialty available, you will be able to select the time and date of the appointment.

It is requested that the system have a main page where a navigation bar is displayed, it must contain options that lead me to know the general information of the clinic in addition to the mission and vision. It must contain another option with the employees who work in the clinic, it must contain information platforms such as social networks, telephone and email.

It must contain the services offered, in this way the patient who enters the page will be able to know if there is the specialty he needs and finally the location of the clinic.

Based on the system requirements, AlphaTeam will produce for them.
